WORK EXPERIENCE

Resident Developer

NYC Tech Talent Pipeline

📅 January 2018 - current

📍 New York, NY

- Worked on building complex applications using a variety of frameworks including Django, React and Flask
- Contributed to various aspects of applications, including both frontend and backend
- Collaborated with numerous other members to develop elegant webpages with various intricate functionalities and features
- As lead developer, I made critical decisions of project structures and approaches, in an effort to produce elegant, yet optimal, applications
- Aided and educated those with little to no previous web development experience, resulting in better looking webpages with various functionalities

PROJECTS

Portfolio Site

Creator

📅 October 2021 - November 2022

- Developed a visually pleasing website that showcases my abilities in web development and my overall accomplishments
- Utilized media queries to deliver a tailored style sheet to desktops, laptops, tablets, and mobile devices.
- Implemented Firebase to help build, deploy, and host my webpage

Food Talk

Project Member

📅 January 2022 - January 2022

- Built and structured the logic of the application using Django to provide optimal user experience
- Designed and Developed the application's home page and navigation bar
- Incorporated Django Template Syntax to import navigation bar to other webpages, eliminating the presence of repetitive code and making it easier for changes take effect on all webpages

World Cup 2022 Countdown

Project Member

📅 January 2022 - January 2022

- Built and structured the logic of the application using React and Node.js
- Designed an elegant and intricate carousel using HTML, JS, and CSS with numerous functionalities which displayed crucial information regarding the event
- Assisted other project members in the development of crucial functionalities, resulting in the creation of intricate and error-free features
